For Immediate Release

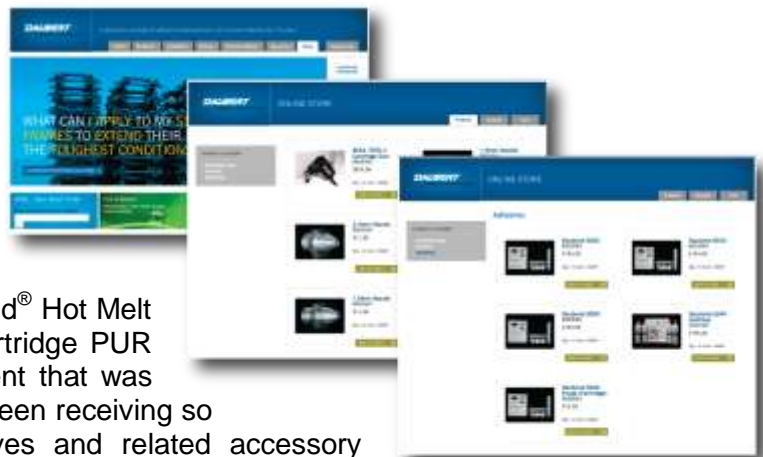

DAUBERT CHEMICAL ONLINE STORE OPEN FOR BUSINESS 24/7 (WWW.DAUBERTCHEMICAL.COM)

Leave it to Daubert Chemical to come up with solutions that ensure customer needs are met. With their new Online Store (daubertchemical.com) Daubert's strong commitment to its customers continues.

The online store is the result of solid business growth, especially in the Daubond® Hot Melt PUR adhesives line, filling a need for cartridge PUR products and related application equipment that was not being met. In fact, the company had been receiving so many customer calls about the adhesives and related accessory equipment (as well as the REKA TR70.3 cartridge Hot Melt PUR application gun) that it decided to launch its new online store. **Featuring nearly 30 accessories** that include various nozzles, cartridge extensions, nozzle inserts, adapters, needles and caps, the online store accommodates customer orders 24/7. According to Glenn Bilek, Vice President, *"We had many customers calling in orders for these items and paying with a credit card. With many such customers possibly running more than one shift, an online store gives them the ability to order items outside typical business hours, making turnaround time even better than a phone order. For items in stock, we'll ship orders within two business days."*

In addition to the Daubond® Hot Melt PUR cartridges, which includes Daubond® 8022, 8032, 8050, and 8026, as well as adhesive equipment accessories, customers can also purchase Motorstor® and select Nox-Rust® products online, too.

Keep in mind that the online store has only recently launched. Over time, Daubert will be offering additional products from its extensive product offerings. We look forward to giving you more highlights in the very near future.

About Daubert. Since 1935, Daubert Chemical Company has held a leadership role in providing Specialty Coatings and Adhesives. Serving the steel, automotive transportation and general manufacturing industries, Daubert is focused on corrosion prevention coatings, industrial anti-skid coatings, sound deadening coatings, specialty adhesives, as well as concentrate formulations to service the aerosol packaging industry.
