

WHEN IT COMES TO RUST AND CORROSION PREVENTION... WE'VE GOT YOU COVERED!

FROM THE STEEL MILL TO THE STREET, THERE IS A TECTYL® PRODUCT THAT STOPS RUST AND CORROSION!

TECTYL Has A Rust Proofing or Corrosion Prevention Product To Safeguard Nearly Every Auto Part, During The Manufacturing Process And Beyond!

Auto parts such as chassis, frame, engine components, underbody, door panels, hinges, wiring, molding, clips, fasteners, and more are under attack from their surrounding environment from the moment they are made. You can protect car parts from corrosion with TECTYL products.

TECTYL offers the most complete line of rust proofing and protective coating products to OEMs, Tier 1 and aftermarket suppliers. TECTYL products bond to metal

auto parts to create a physical and chemical barrier that repels moisture, salt spray and other harsh corrosives.

TECTYL Products Offer The Features OEMs and Aftermarket Suppliers Want!

- TECTYL products have been approved for various automotive applications by OEM's around the globe.
- Spray-on application makes many TECTYL products easy to use.

- One-coat can give auto parts lasting protection and minimizes expense and time.
- Reduced emissions from TECTYL's Low or Zero VOC products help protect the environment.
